Safety Rope Switches from IDEM

Data Sheet Guardian Line Series

Heavy Duty Types: GLHD (Dual Head)
GLHD-SS (Dual Head)

GLHR/L (Single Head)
GLHR/L-SS (Single Head)

Standard Duty Types: GLS
GLS-SS

Mini Duty Type: GLM

Using Safety Rope Emergency Stop Switches

Application:

Safety Rope Emergency Stop Switches are mounted on machines and sections of plant conveyors which cannot be protected by guards. In contrast to traditional mushroom head type Emergency Stop buttons, Safety Rope Switches can initiate the emergency command from any point along the installed rope length.

In combination with any dual channel safety monitoring controllers IDEM Safety Rope Systems can be used as emergency stop devices and monitored for up to Category PLe / Cat.4 to ISO13849-1.

Operation:

All IDEM Safety Rope Emergency Stop Switches conform to European Standard ISO13850 (EN 418) and IEC 60947-5-5. They have a positive mechanical linkage between the switch contacts and the wire rope as per IEC 60947-5-1. The emergency stop switches are brought into the operational condition by pre-tensioning the rope by use of a tensioner/gripper device which clamps the rope and then hooks to the switch eyebolts. Correct tension can be observed by viewing the tension indicator on the switch housing. Once tensioned the switch contact blocks can be set to the operational condition (safety contacts closed, auxiliary contacts open) by pressing a blue reset button on the switch cover.

All of the Safety Rope Switches have wire-breakage monitoring. On pulling or breakage (tension loss) of the rope, the safety contacts are positively opened and the auxiliary contacts are closed. The switches are mechanically latched and can then only be returned to the operational condition by pressing the reset button as required by ISO13850 (EN418).

Installation Guide:

1. Installation of all IDEM Safety Rope Switch systems must be in accordance with a risk assessment for the individual application. Installation must only be carried out by competent personnel and in accordance with these instructions.

2. According to ISO13850 (EN 418), pulleys may only be mounted such that a complete length of the rope can be observed.

3. Rope support eyebolts must be fitted at 2.5 m. min. to 3m. max. intervals along all rope lengths between switches. The rope must be supported no more than 500mm from the Switch eyebolt or Safety Spring (if used). It is important that this first 500mm is not used as part of the active protection coverage.

4. M5 mounting bolts must be used to fix the switches. Tightening torque for mounting bolts to ensure reliable fixing is 4 Nm. Tightening torque for the lid screws, conduit entry plugs and cable glands must be 1.5 Nm to ensure IP seal. Only use the correct size gland for the conduit entry and cable outside diameter.

5. Tensioning of rope is achieved by use of IDEM tensioner/gripper assemblies.

Upon installation, tension to mid position as indicated by the green arrows in the viewing window of each switch. Check operation of all switches and the control circuits by pulling the rope at various locations along the active protection area and resetting each switch by depressing the Blue Reset button. Ensure each time that the switches latch off and require manual resetting by depressing the blue reset button. Increase the system tension further, if required, depending upon the checks along the active length of coverage.

If fitted with a Mushroom type E-Stop button (Red) then test and reset each switch to ensure correct function of the safety control circuits.

Typical operational conditions for successful operation of the system is less than 75N. pulling force and less than 150mm deflection of rope between eyebolt supports.

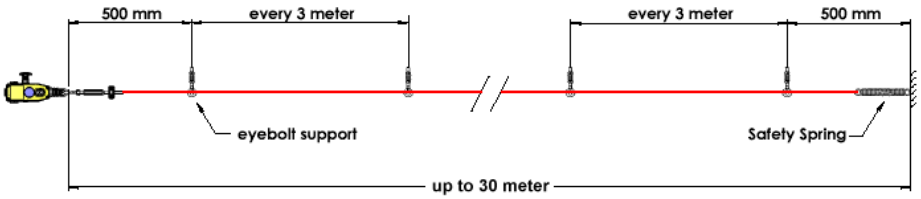
6. Maintenance:

Every Week: Check correct operation of system at locations along all coverage length.
Check for nominal tension setting, re-tension rope if necessary.
Every 6 Months: Isolate power and remove cover.
Check screw terminal tightness and check for signs of moisture ingress.

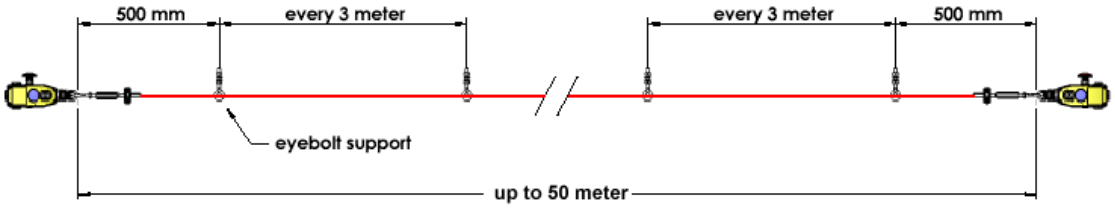
Never attempt to repair any switch.

Safety Rope Switches from IDEM

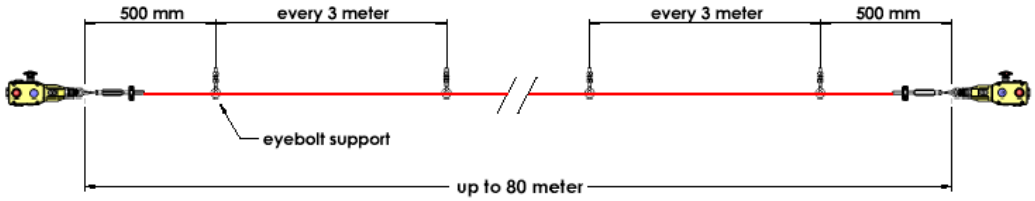
7. Recommended rope span options and fittings - (subject to an individual risk assessment for the installation):



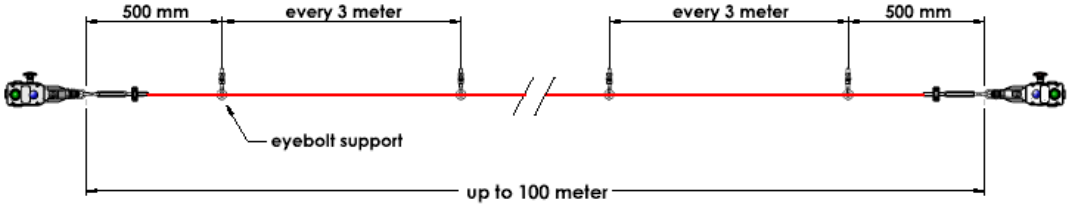
GLM 30m.
with Safety Spring



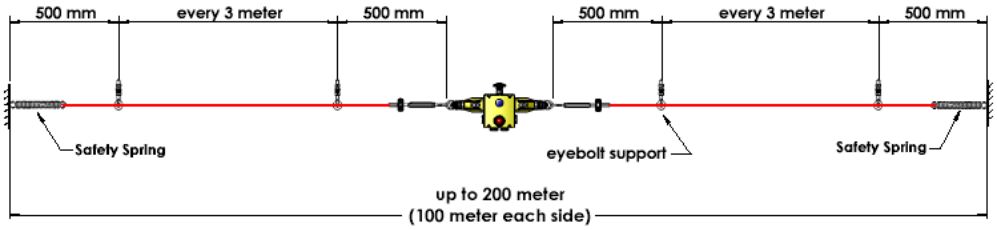
GLM 50m.



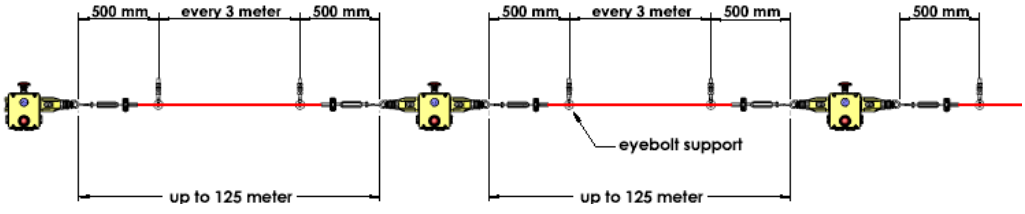
GLS 80m.



GLS-SS 100m.



GLHD 200m.
with Safety Springs



GLHD/L/R 250m.

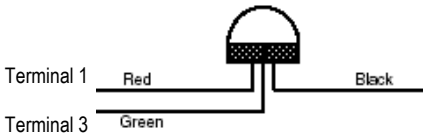
8. Wiring examples:

LED Flashing Red - Stopped
LED Steady Green - Run



When power is applied to the Red wire, the lamp will illuminate Red and Flash.
When power is applied to the Green Wire, the Lamp will illuminate Green.
Black is 0V.dc or Neutral for 110Vac and 230Vac versions.

9. To fit Mushroom type Emergency stop Buttons:
a) Remove M12 threaded plug from the mounting port.
b) Apply thread locking solution to the threads of the E Stop mechanism.
c) Insert the Emergency Stop Mechanism into the mounting port and tighten to 1.5Nm.
d) After installation test and reset to ensure all safety circuits are functioning correctly.

10. Technical Specifications

Standards:	IEC 60947-5- IEC60947-5-5 UL508 ISO13850 IEC 13849-1
Approvals:	cULus TUV
Mechanical Features:	
Enclosure / Cover	Die-Cast – Painted Yellow
External Parts	Stainless Steel
IP Rating	IP67
Rope Spans	Dual Head 250m.
Rope Tension device	IDEM Tensioner / Gripper – Quick Fixing
Rope Type:	4.0mm Outside Dia. Steel inner-PVC sheath
Mounting	4 x M5
Mounting position	
Conduit entries	4 x M20 or 4 x ½ " NPT by part number
Torque settings	Mounting M5 4.0 Nm Lid T20 Torx M4 1.5 Nm Terminals 1.0 Nm
Ambient Temperature	-25C. 80 C. (-40C. for -FZ versions).
Vibration resistance	10-500Hz 0.35mm
Shock resistance	15g 11ms
Tension Force (typical mid setting)	130N.
Typical Operating Force (Rope pulled)	< 125N. < 300mm Deflection
Approx. Weight	GLHD-SS 2200g. GLHL / R-SS 2000g. GLHD 1320g. GLHL / R 1100g. GLS 880g. GLS-SS 1635g. GLM 675g.

Electrical:	
Safety Contact type	IEC 60947-5-1 Double break Type Zb
Contact Material	Silver
Termination	Clamp up to 2.5 sq. mm conductors
Rating	Utilisation Category : AC15
Operational Rating	AC15 A300 240V. 3A /120V 6A. ac 24V. 2.5A dc inductive
Thermal Current (Ith)	10A
Rated Insulation Voltage (Ui)	500V.
Withstand Voltage (Uimp)	2500V.
Short Circuit Overload Protection	Fuse Externally 10A. (FF)

Rated Voltage	250V ac/dc
Rated Current	2 pole 4A. 4 pole 2.5A.
Optional AS-I Safe versions M12	
Operation / Fault / Function	Green / Yellow / Red
AS-interface / extended cross mode possible	Version 2.1 / no
AS-I profile	S-7.B.E
I/O configuration / ID code	7(Hex) / B.E(Hex)
Safety Classification and Reliability Data:	
Mechanical Reliability B10d	1.5 x 10^6 operations at 100mA load
EN 954-1	up to Category 4 with Safety Relay
ISO 13849-1	up to PLe depending upon system architecture
EN 62061	up to SIL3 depending upon system architecture
Safety Data - Annual Usage	8 cycles per hour / 24 hours per day / 365 days
PFHd	<1.0 x 10^{-7}
Proof Test Interval (Life)	21 years
MTTFd	214 years

Information with regard to UL 508:
Type 1 Enclosures.
Use 12AWG copper conductors only.
Intended for same polarity use and one polymeric conduit connection.
Electrical Rating: A300. 48W5.
Max. Switching Current / Volt / Amp:
120V. 6A. (720VA break) PF 0.38
240V. 3A. (720VA break) PF 0.38
