About NOVUS

For over 30 years, **NOVUS** has developed and manufactured innovative and reliable products for data acquisition, temperature and process control, signal conditioning and transmission of field variables complying with worldwide quality requirements providing solutions that exceed customers' expectations.

NOVUS is present in over 60 countries through a network of over 300 distributors and its own sales offices in Brazil, Argentina, the United States and France.

In 2018 **NOVUS** moved into its new headquarter facilities in the city of Canoas, southern Brazil. With more than five thousand square meters of built area, three thousand dedicated to factory, the new plant ensures the possibility to quadruplicate production capability.

Among the innovations, a real-time reconfigurable, autonomous manufacturing cell was implemented under Industry 4.0 concepts.

As part of **NOVUS** strategic plans, moving our highly skilled staff to larger and more modern facilities with an advanced production infrastructure along with well equiped research laboratories opens the path to productivity improvements achivieving higher throughput of a larger portifolio of valued added products and the consequent increase in national and international market shares.

Currently, half of the production is destined for export which is growing rapidly due to product quality recognition and added value perception in the world market.

Certifications and Approvals

Summary
Business Units

Data Acquisition and Communication

Data acquisition systems, I/O modules, wireless connectivity and gateways.

Sensing, Conditioning and Transmitters

Signal conditioners, temperature, relative humidity and pressure transmitters.

Process Control and Indication

Process controllers, temperature controllers, process indicators, electronic thermostats and HMIs.

Software Interface

Computer software and smartphone applications (for device configuration, data download and data acquisition), SCADA software, and cloud based platforms.

Metrology Services

Metrology services for temperature, relative humidity, pressure, electrical parameters, mass, volume, conductivity, time/frequency, and pH instruments.

Wireless Multichannel Data Loggers - LogBox Connect

LogBox Connect provides data acquisition and connectivity for any type of application. With all its wireless options, **LogBox Connect** is the gateway to the connected world.

Bluetooth Data Logger

- Suitable for battery operated applications
- Configuration and data download via USB or Bluetooth
- Powered by 4 AA alkaline batteries or external DC power supply
- Data communication via Bluetooth using **NXperience Mobile** app
- Free app for data download and configuration on Windows, Android and iOS

APPLICATIONS

Laboratory   **Cold Chain**   **Data Centers**

LogBox BLE

Wi-Fi Data Logger

- Suitable for distributed environments with existing Wi-Fi infrastructure
- Configuration and data download via USB or Wi-Fi
- Alarm notification via email
- Free app for data download and configuration on Windows, Android and iOS
- Ease of integration with Cloud based platforms, including **NOVUS Cloud**

APPLICATIONS

Distribution Centers   **Cold Chain**   **Commercial Refrigeration**

LogBox Wi-Fi

3G/2G Data Logger

- Suitable for mobile or applications over long distances
- Configuration and data download via USB or 3G
- Alarm notification via SMS
- Built-in rechargeable backup battery with more than 8 h autonomy
- Free app for configuration and data download on Windows®, Android® and iOS®
- Ease of integration with Cloud based platforms, including **NOVUS Cloud**
- Data communication via 3G network through **NXperience** and SCADA software

APPLICATIONS

Utility Services   **Transportation of Temperature Sensitive Products**   **Agricultural Greenhouses**

3G

LogBox 3G

Industrial Multichannel Data Logger - FieldLogger

FieldLogger high performance instrument for reading and recording variables with high input/output density and several options for displaying, logging and processing information. It can also be used as an analog + digital I/O expansion for PLCs in monitoring and control applications.

Easy to operate and to configure, **FieldLogger** has superior performance and a high degree of connectivity. Its colorful and detachable human-machine interface can be detached and used remotely, adapting to the most different processes and rigid safety standards.
FieldLogger

I/Os
- 8 Universal analog inputs
  - Thermocouples (J, K, T, N, E, R, S, and B), 0-5V, 0-10V, mV, mA, Pt100, and Pt1000
  - 128 virtual channels (refer to Mathematical Functions)
  - Sampling rate up of to 1000 readings/second (24-bit A-D conversion)
- 2 Relay outputs
- 8 Digital I/Os individually configurable as input or output

RECORDING
- Internal memory of up to 512,000 recordings
- Memory extension with SD or SDHC card
- Records up to 100 channels (local, remote or virtual variables)
- Recording rate of 1000 logs/second (max)
- Data download through configuration software (USB device, RS485, Ethernet or USB drive)

HMI
- 2.4" color QVGA screen and 96 x 48 mm format
- Screen menu with current channel value, history chart, and status information
- Allows to view and configure parameters
- Local or remote installation with RS485 communication

Optional HMI with color QVGA display

COMMUNICATION INTERFACES
- RS485 "Master" for reading from up to 64 remote channels (Modbus protocol)
- RS485 "Slave" for communicating with SCADA software or Host
- USB "Device" port for instrument configuration and data download
- USB "Host" port for downloading recorded data into USB drive)
- Ethernet (10/100 Mbps) – Optional
  - Protocols DHCP, HTTP, FTP, SNMP, SMTP Client, and
- Modbus TCP
  - Custom webpage server in XML format
  - Operates as a gateway between a Modbus TCP network and a Modbus RTU network

MATHEMATICAL FUNCTIONS
- Supports up to 128 virtual channels
- Each virtual channel is a mathematical or logical operation performed over any input channel
- The result of one virtual channel can be used as input to another, which allows one to create complex formulas

ALARMS
- Up to 32 configurable alarms (with local, remote or virtual channels)
- The occurrence of an alarm allows:
  - Relay activation
  - Digital outputs activation
  - Sending emails to multiple recipients
  - Sending SNMP traps
  - Start and stop logging

I/O Modules

Ethernet I/O Module

- Mixed I/Os (analog and digital)
- Ethernet with Modbus TCP/IP protocol
- RS485 with Modbus RTU protocol
- Configurable via USB
- Advanced I/O functions

DigiRail Connect is a versatile DIN rail I/O module with Ethernet interface which can be easily integrated to any automation system.

With a flexible mix of industry-standard inputs and outputs, it performs field analog and digital signal handling with outstanding accuracy.

Specially designed to comply with international electromagnetic compatibility standards, it ensures robustness and reliability in the most demanding industrial applications.
APPLICATIONS

Industry   **Energy**   **Steel Industry**   **Distribution Center**

suitable to **INDUSTRY 4.0**

DigiRail Connect

Programmable I/O Module

- Mixed I/Os (analog and digital)
- Rugged and reliable for industrial applications
- RS485 interface
- High-Level Programming with Arduino IDE

DigiRail NXprog is a programmable I/O module compatible with Arduino integrated development environment (IDE). With a mix of both analog and digital I/Os, **DigiRail NXprog** can be used as a controller in custom applications for machine or process automation.

Flexible user programmability allows access to the local I/Os and the communication interface.

The device can run complex algorithms and can connect with other devices via Modbus RTU protocol. **DigiRail NXprog** can run Arduino library codes or custom ones, providing great versatility in a wide range of applications.

APPLICATIONS

General Automation   **Food and Beverages**   **Plastics and Packaging**   **Water and Wastewater**

COMPATIBLE WITH **ARDUINO**

DigiRail NXprog

Programmable in Arduino IDE

Communication

Wireless Modbus Gateway

AirGate Modbus is a multifunctional device that can be used as a wireless repeater, Modbus master multiplexer, Modbus network wireless segment or as an RS485 USB converter.

- Wireless branches for any wired RS485 network node
- Four operation modes
- Automatic configuration of a wireless tree topology network
- Connects devices up to 1000 meters apart
- Easy-to-use configuration software

AirGate Modbus

Modbus Network 1   **Modbus Network 2**

Modbus RS485 network extension

Scalable wireless network
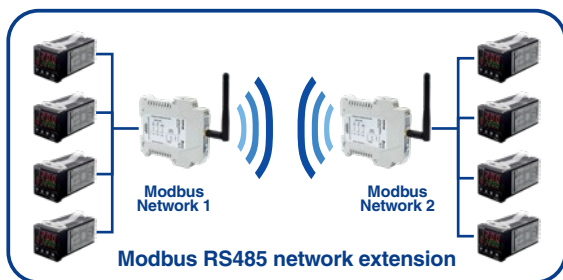

VPN Router for GSM Networks

AirGate 4G is a cellular VPN router for industrial use, which guarantees secure remote access for distributed applications, as it has the most common encryption protocols in the IT infrastructure and the fallback function for 4G / 3G / 2G. **AirGate 4G** is able to work with any communication protocol on any interface and can still be managed locally or remotely.

- Dual SIM card for connection redundancy
- Two Ethernet ports, WiFi, RS232 and RS485
- Up to two digital inputs and two digital outputs
- Metal housing with DIN rail mounting

FEATURES

✉ SMS ☁ 🔒VPN

AirGate 4G

Profibus to Modbus Gateway

DigiGate Profibus is a cost-effective gateway for communication between Profibus and Modbus networks. The gateway takes care of all protocols specificities to forward Profibus DP commands to devices connected in a Modbus network.

- LED indicators for communication status
- Reliable interconnection between a Profibus and a Modbus network
- Profibus network acts as the master to Modbus devices
- Easy configuration via **DigiConfig** for Windows®

DigiGate Profibus

Modbus IO Modules

DigiRail signal conditioning modules can easily integrate different analog or digital signals into PLCs or supervisory systems in a cost-effective way being the right choice for input and output expansion with great flexibility.

- Communication and status LED indicators
- Universal and configurable inputs and outputs
- Configuration and calibration can be performed with the free **DigiConfig** software

DigiRail 2A, 2R e 4C

DigiRail 2A

Two universal analog inputs
- Analog inputs: type J, K, T, E, N, R, S and B T/Cs, Pt100, mV, V, mA
- Resolution: 17 bits
- Isolation: 1000 Vac between inputs and power or communication port

DigiRail 4C

Four digital I/Os
- Fast inputs allow up to 1000 Hz digital signals
- Resolution: 32-bit counting
- Isolation: 1000 Vdc between input

DigiRail 2R

Two relay outputs
- 8 A / 250 Vac SPDT relay, resistive load
- Configurable activation time
- Isolation: 2000 Vac between power and communication

Electrical Parameters Transmitter

DigiRail-VA is a cost effective electrical parameters signal conditioner and transmitter specifically designed for single phase AC power analysis and measurement applications.

- Measures voltage, current, active power, apparent power, reactive power, frequency, and power factor
- Retransmits the measured variables in both analog and digital (RS485 Modbus) ways
- Features a USB interface for configuration and reading
- Easy-to-use DigiConfig configuration software (free of charge)

DigiRail VA

USB to RS485 Converter

Fast and reliable solution for interfacing between PCs and RS485 or RS422 industrial communication buses.

- Plug and Play USB Interface
- Automatic detection and installation when connected to USB
- Compatible with any serial communication application
- Compact and easy to use in the field

USB i485

Pressure Transmitters

Ultra Low Differential Pressure Transmitter

Ideal for HVAC, clean-room and flow measurement applications, **NP785** is an ultra low differential pressure transmitter for measuring very small over-pressures, under-pressure and differential pressure in neutral and non-corrosive gaseous media. It provides linear pressure characteristic with configurable measuring range via USB using the configuration software.

NP785 can operate bi-directionally, being able to measure differential pressure ranges from vacuum to positive pressure. It is housed in a DIN rail mountable ABS/PC enclosure and its nickel plated brass fittings accept pneumatic hoses with 4 mm or 6 mm internal diameter. The analog output can be set to either 0-10 V or 4-20 mA while having an RS485 with Modbus RTU communication protocol. Designed for HVAC and industrial environment, **NP785** ensures temperature compensation for long-term stability and complies with EMC standards, providing robustness and reliability for a wide range of applications.

- Available ranges of ± 5 mbar and ± 20 mbar, reprogrammable
- Temperature compensated for higher stability at low pressures
- 4 or 6 mm connection for pneumatic hoses
- Output signal 0 to 10 V or 4 to 20 mA and slave Modbus RTU, in one-only-model
- Zero range and span fully configurable by software

NP785

Current Loop Indicator

LoopView is a two-wire 4-20 mA, loop-powered indicator. Its excellent accuracy allows the indication of many physical quantities such as pressure, differential pressure, level, flow, pH, relative humidity, temperature, acceleration and others.

LoopView is powered by the current loop. It is inserted into sensors already installed in industrial facilities.

This device has a 4-digit display and 2 keys for the adjustment of indication range, decimal point position, digital filter and user calibration, in a quick and easy way.

The parameters modification is password protected and is accomplished directly in the indicator through its panel keys.

LoopView

- Compact size: 65 x 45 x 45 mm (2.55 x 1.77 x 1.77 in)
- Loop-powered, does not require external power supply
- 4-digit red LED display with adjustable range
- Connectors standard EN175301-803 (old DIN 43650) male and female
- Easy configuration by front panel keys
- Easy to assemble onto transmitters
- Adjustable engineering unit indication

COUPLED TO PRESSURE SENSORS

COUPLED WITH TEMPERATURE SENSORS

Temperature Sensor

Pressure Transmitters

Pressure Transmitters

The rangeability of **NP640** pressure transmitter brings versatility, allowing its transmission ranges to be turned down to up to 1/3 of its nominal range. Featuring high accuracy coupled with temperature stability, the **NP640** performs well in the most challenging applications and in harsh environments.

- Customer configuration of range via USB
- All stainless steel media compatibility
- High accuracy 0.25% of full scale
- USB Configuration via free software and adapter interface

NP640

Through the **TxConfig DIN43650** interface and the free **TxConfig II** software the **NP600** pressure transmitters series can be fully configured according to customer's preferred range and unit needs (bar, mbar, Mpa, kPa, kgf / m2, kgf / cm2, atm, mH20, psi).

In addition, output status can be set up for upscale or downscale alarm in case of error and zeroing function is also available. The **TxConfig II** software brings great versatility to the end user by allowing range configuration right in the process.

Thermal Drift	< ± 0.06 % FS/°C	< ± 0.05 % FS/°C	
Dynamic Response	< 30 ms		
Overpressure	2 x FS		

Relative Humidity and Temperature Transmitters

Wireless Relative Humidity and Temperature Transmitter

RHT Air is a wireless relative humidity and temperature transmitter which operates over long distances and allows configuration and parameters reading over a wireless network within 500 m distance. It has a long operating battery life combined with the convenience of a wireless sensor that avoids electrical noise susceptibility ensuring a robust and secure solution. Operation without cables or wires simplifies installation and relocation of devices. **RHT Air** operates on its own wireless network and works independently from the company's IT infrastructure.

- Relative humidity and temperature measurement over long distances
- Independent industrial wireless network
- Long operating battery life
- Easy network scalability
- Noise immunity

High Accuracy Relative Humidity and Temperature Transmitter

RHT Climate relative humidity and temperature transmitter provides highly accurate and stable measurements and transmits both signals via two independent analog outputs and the RS485 Modbus RTU communication. The **RHT Climate** is fully USB configurable through its free **NXperience** software which also performs diagnostics and input/output simulation, instalation and comissioning tasks.
RHT Climate is available with or without LCD display for duct or wall mounting with different probe lengths.

- High accuracy measurement
- Large display with backlight
- Configurable analog outputs
- Configuration via USB or front keys
- Alarm outputs and buzzer

Temperature Transmitters

Built-in Temperature Transmitters

The **TxMini** series are compact and yet accurate loop powered temperature transmitters designed for conditioning Pt100 and Pt1000 sensors in a very small package for embedded applications.

Configuration can be done through a USB interface without any power supply.

A Modbus RTU communication version is offered with M12 connector suitable for networked applications.

HART® Temperature Transmitters

The **TxIsoRail-HRT** temperature transmitter combines the proven quality of HART® certification with the robustness of **NOVUS** devices. It is compatible with HART® certified devices and has electrical isolation between input and output, supporting voltage surges up to 1.5 kVrms.

Using a worldwide known protocol, with over 40 million field instruments supporting HART® technology, **NOVUS TxIsoRail-HRT** temperature transmitter enables the use of standard HART® configuration and supervision software that provides users with great flexibility in remote configuration and calibration capability through the two-wire 4-20 mA current loop without having to remove it from the plant.

TxIsoRail HRT and **TxIsoBlock HRT**, the **NOVUS** HART® temperature transmitters, are fully compatible with HART® certified devices from worldwide market. Full configuration can be done only with two-wire 4-20 mA current loop, providing more features for device configuration and monitoring and this is the big spotlight of the HART® devices. When a configuration change is needed, for example, remote interaction can be done with the device without removing it from the installation place.

Controllers

PID Controller with LCD Display

N1050 is a PID temperature controller with LCD that combines high performance and vivid design. It combines the proven robustness of **NOVUS** PID algorithm with a large and bright easy-to-read dual color 11-segment LCD display with alphanumeric mnemonics and crystal clear status signaling.

It also features 5 ramp-and-soak profile programs, soft start output and timer function which complement the advanced features of the controller.

- Wide and high contrast dual color LCD display
- Distinguished multi angle viewing
- Compact depth, suitable for restricted spaces
- Elegant design for machines
- Ramp and Soak programs and timer function

Compact PID Controller

N1030 is a temperature controller that features a high performance PID algorithm in a very compact housing with only 35 mm depth.

Its innovative compact construction and the convenient detachable connector provide an easy set up on short profile panels, optimizing scarce space and reducing installation cost. It has two outputs always available which can be configured both as a control or an alarm.

- Compact profile, only 35 mm depth
- Detachable connector simplifies device installation, commissioning and maintainance
- IP 65 protection rate ensures resistance to water jets
- Protection and safety according to UL94 V-2 anti-flame housing
- Timer and two relay options to suit different processes

Universal Process Indicator

N1540 is a high technology process indicator designed for the best performance and reliability in most demanding applications. Based on an advanced and rugged hardware platform, the **N1540** can be fully configured from the frontal keyboard or USB port. The exclusive USB interface allows, for example, to configure several devices with the same parameters in an easy way, saving time in the setup. Compact, the device has a 34 mm depth and can be easily installed in panels where space is restricted.

- Universal input: TCs J, K, T, E, N, R, S, B, P100, 0-50 mV, 0-5 V, 0-10 V, 0-20 mA, and 4-20 mA
- Sampling rate up to 50 samples per second
- Two relays SPST 1.5 A / 240 Vca
- Holds minimum and maximum values

Panel PC

Glass capacitive touch panel

NXview is a unique great looking operator interface designed for outstanding machine or process automation. Its crystal-clear high definition 7" color display provides the best user experience visualization. Its glass capacitive panel allows tablet-like usage with multi touch capability.

Designed with Linux based embedded system and a powerful processing core, the **NXview** offers a high performance platform to most types of machines, for standalone or networked operation.

Its integrated mixed I/Os simplify signal conditioning as an all-in-one device solution for automation.

The standard Modbus RTU on RS485 or Modbus TCP on Ethernet interfaces along with the optional WiFi interface ensure total flexibility in system connectivity.

Additionally, its thin bezel, low profile and water and dust protection enclosure turns **NXview** the right choice for machine automation control panel.

NXview

Display	7" Capacitive Multi-Touch Widescreen IPS Panel (multi-viewing angle)
Resolution	1024 x 600
Brightness	500 cd/m² (NITS)
Color	RGB 24 bits - 16.8 millions of colors
Communication Interfaces	Ethernet USB Host USB device RS485 SD Card slot
RAM Memory	256 MB
Flash Memory	512 MB Flash
RTC	Built-in RTC

APPLICATIONS

Food Processing Machine

Production Management in MES Systems

Industrial Machine User Interface

Indoor Comfort Room Display

Electronic Thermostats

Refrigeration Thermostat with Defrost

- Refrigeration control with automatic defrost
- Defrost by compressor stop, resistance heating or reverse cycle
- Programmable defrost cycle intervals
- Keeps indication during defrosting cycle
- Programmable delay on power-up to prevent simultaneous loads
- Control relay can directly switch compressor up to 1 hp

Models:
N321R: one output for compressor, accepts sensor type NTC, Pt100 or Pt1000 and optional voltage protection for compressor
N323R: three outputs (compressor, defrost and fan), monitors 2 NTC sensors (chamber and evaporator)
N323TR: similar to **N323R** plus real time clock for scheduling defrost events, with weekly timer,

Typical application:
Refrigeration cooling counters and air conditioning systems
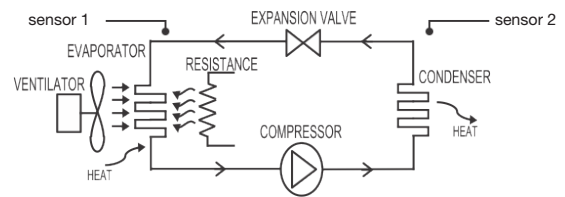

Solar Heating Controller

- Ideal for solar panels applications
- Operates by the temperature difference between the solar collector and the storage tank
- Uses 2 NTC type sensors (included)
- Output control relay drives the water circulation pump
- Protection against pipeline overheating or freezing

Models:
N321S: one output for circulation pump
N322S: two outputs for circulation pump and waer heater booster

Typical application:
Thermal tank, pool heating, and boiler

Cooling/Heating Controller

- Control with alarm or multi-stage
- Direct drive of compressors or electric heaters
- Programmable delay on powerup to avoid simultaneous switching
- Low, high or differential alarm functions
- Sensor type: NTC, Pt100, Pt1000, and thermocouples J, K and T
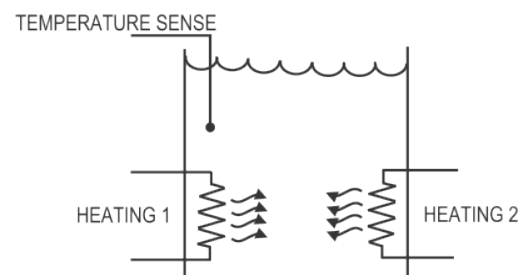

Models:
N321: one relay output control
N322: two outputs (control and alarm or second control)
N323: three outputs (control and 2 alarms or 3 control stages)

Typical application:
Cold chambers, ovens, food industry, and commercial refrigerators

Controller with Timer

- Suitable for processes with cyclic operation requirement
- Timer for forced defrost cycle or stirring of liquids
- Accepts the following sensors: NTC, Pt100, Pt1000, and thermocouples J, K and T
- Programmable delay on powerup to avoid simultaneous switching
- Control relay can directly switch compressor up to 1 hp
- Optional: audible alert and voltage protection for compressor

Models:
N322T: two outputs (control and defrost or timer output)

Typical application:
Milk cooling and ice cream machines
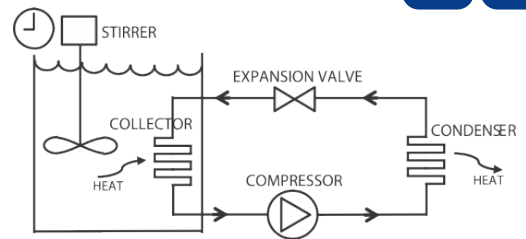

Electronic Humidistat

- Environment control, displays temperature and humidity
- Configurable interval between temperature and humidity indication
- Control relay can directly switch compressor up to 1 hp
- Heating or cooling temperature control
- Humidification or dehumidification control
- Uses integrated RHT probe (sold separately)

Models:
N322RHT: two relay outputs (either control or alarm)
N323RHT: three relay outputs (control, alarm or timer function)

Typical application:
Climate chambers, textile processes, and environmental control

Egg Incubator Controller

- Control of humidity and temperature in the incubator (heating and humidification or refrigeration and dehumidification)
- Cycle timing control for egg rolling
- Configurable interval between temperature and humidity indication
- Uses integrated RHT probe (sold separately)

Models:
N323RHT (EI): three outputs (humidifier, heating and egg roll motor)

Typical application:
Egg incubators
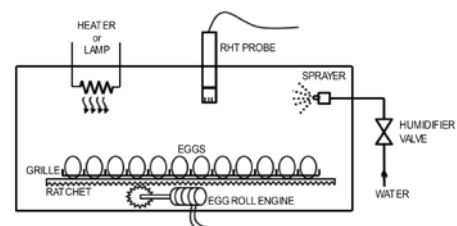

Software Interface

Configuration and Download Tool Software

NXperience is a software suite of tools for **NOVUS** device configuration, diagnostics and data download, as well as data management in a reliable way. With versions for different platforms and requirements, **NXperience Mobile** and the **NXperience Trust** complement the portfolio. With extensive connectivity and powerful data analysis and visualization capabilities, user can access different devices via USB, Modbus RS485 or Ethernet/Wi-Fi connection, or access cloud data from **NOVUS Cloud**.

NXperience makes it possible to adjust the device parameters and functionalities, allowing secure data download and complete analysis, graphical viewing, mathematical formulas, and reports issuance.

NXperience Trust is FDA 21CFR Part 11 compliant and suitable for pharmaceutical, medical, food and drugs applications.

NXperience Mobile is a smartphone application (Android and iOS) for configuring and downloading data wirelessly from LogBox BLE and **LogBox Wi-Fi** devices.

NXperience

NXperience Trust

NXperience Mobile

SCADA – Supervisory Software

SuperView is an industrial process control and supervision software (SCADA) that presents a visual development model to the user for building applications. Besides the communication with Modbus RTU and Modbus TCP devices, it is also possible to use **SuperView** workstations as Client and Server to manage geographically distributed processes on TCP/IP networks.

SuperView Mobile

SuperView

Dashboard and IoT Cloud Platform

NOVUS Cloud is a platform focused on Internet of Things solution that expands the horizons of data viewing. Combined with **NOVUS** devices, this platform receives, stores, analyzes and displays on dashboards measurements of temperature, humidity, pressure, geolocation or any other variable of interest. Data access via the Internet is particulary necessary for several market segments, such as logistics, health, building, energy, sanitation, and agribusiness areas.

NOVUS Cloud

Metrology Laboratory

Calibração ABNT NBR ISO/IEC 17025

CAL 0455
Choosing the right partner ensures your customer satisfaction

NOVUS Metrology Lab is ISO-17025 accredited by the Brazilian National Calibration Body, a signatory of the International Laboratory Accreditation Cooperation (ILAC) Mutual Recognition Agreement (MRA). Its calibration certificates are recognized in over 70 countries, covering metrology services for temperature, relative humidity, pressure, electrical parameters, mass, volume, conductivity, time/frequency, and pH instruments.

Customized services to meet our customer's expectations of deadline and application is what makes **NOVUS Metrology Laboratory** the right partner for your business bringing all all the credibility that an RBC service with internationally recognized certificate can offer.

Economy
- Calibration at **NOVUS** facilities.
- You buy the device and the service with just one process.
- Avoid adittional logistic costs.

Productivity
- Field calibration services (please check covered regions).
- Highly qualified professionals.
- The device is calibrated at the points and ranges you need.

Agility
- Devices calibrated from the factory.
- Customized and scheduled services.

Trustworthy
- High accuracy: significantly lower uncertainty values.
- RBC accreditation.
- ABNT NBR ISO/IEC 17025.

- **Conductivity**
- **Thermal Studies**
- **Mass**
- **Volume**
- **Temperature**
- **pH**
- **Pressure**
- **Electricity**
- **Time/Frequency**
- **Humidity**

WE **MEASURE** WITH ACCURACY.
WE **CONTROL** WITH EXCELLENCY.
WE **RECORD** WITH RELIABILITY.
