

SONAX – for bright successes

To satisfy vehicle owners' increasing demands for top-class car care and professional maintenance, garage experts need partners who provide competent support and advice.

More than 60 years of research & development – made in Germany

The entire SONAX product portfolio reflects more than 60 years of intensive research and development. Strict standards and continuous product improvement assure the lead on the market. In this, we focus on the easy but effective product application. Consistently high rankings in tests of the international technical press and awards of reputable, independent institutions like DEKRA, TÜV or ADAC document the SONAX brand's high quality standard. In addition, many of our products have been certified or officially approved by well-known car manufacturers like Mercedes, BMW, VW/Audi and OPEL/GM.

Play it safe

At SONAX, we have made product safety a top priority. Health and environment protection are firmly anchored business objectives. Research and production are accompanied by a systematic risk management which ensures the safe use of SONAX products throughout the world.

Silicone-free
Low Dust

SONAX ProfiLine Fine Abrasive Paste

Removes dust inclusions, spray paint mist and sanding traces. Ideal for the restoration of weathered and scratched paint. High abrasion with medium shine effect. Removes sanding marks of P1500 sand papers. Wax and silicone-free.

Apply product onto **SONAX Lambskin** (493 141) or **SONAX Polishing Pad yellow** (493 100)
 Polishing procedure phase 1: Pressure: max. 10 kg Speed: 800 rpm Duration: 60 sec./m²
 Polishing procedure phase 2: Pressure: max. 1-2 kg Speed: 1500 rpm Duration: 30 sec./m²
 Remove residue with **SONAX Microfibre Cloth ultrafine** (450 700).

For the finishing touch, we recommend using **SONAX ProfiLine Nano Polish**.

Removes sanding marks of P1500

Art.No. 319 300 1 L/33.8 FL OZ

Silicone-free
Low Dust

SONAX ProfiLine Nano Polish

Silicone-free polish for matt and scratched paintwork and scratch-proof clear paint. Ideal as finish after applying abrasive polishes. The use of a new type of nano-sized abrasives enables rapid polishing, while effectively removing scratches and producing a brilliant gloss. Removes sanding marks of P2500 sand papers. Hologram-free polishing result.

Apply product evenly on orange **SONAX Polishing Pad orange** (493 000)
 Polishing procedure phase 1: Pressure: max. 10 kg Speed: 800 rpm Duration: 30 sec./m²
 Polishing procedure phase 2: Pressure: max. 1-2 kg Speed: 1500 rpm Duration: 90 sec./m²
 Remove residue with **SONAX Microfibre Cloth ultrafine** (450 700).

Removes sanding marks of P2500

Silicone-free
OEM tested

SONAX ProfiLine Perfect Finish

Innovative paintwork finishing polish provides an initial deep cut, then diminishes to a high gloss, resulting in a hologram-free paint surface. "Like-new" results can be achieved in a single step. Silicone-free formula is an excellent choice for paint and body shops.

Large abrasive components are good for compounding while smaller components show high gloss and great for finishing. A single polish could not accomplish both until SONAX engineered and developed Perfect Finish.

If necessary, wet sand with P2000 sand paper, then wipe clean. Apply polish onto each sanded area. Polish on for 10 seconds at a low rotating speed with a **SONAX Polishing Pad Orange** (493 000), tilting the machine slightly. Exerting no pressure, finish polish for 20 seconds holding the sponge level. Wipe over with a **SONAX Microfibre Cloth ultrafine** (450 700). When used in car valeting (car detailing), apply a small amount of polish onto the **SONAX Polishing Pad Orange** (493 000) (3 or 4 dime-sized drops). Polish the surface at a low rotating speed (800 rpm) for approx. 20-30 seconds, applying 15-20 pounds of pressure. After 30 seconds, remove pressure completely using only machine weight, increase machine speed (1200 rpm) and continue polishing for 45-60 seconds. When finished polishing, wipe down the paint surface with a **SONAX Microfibre Cloth ultrafine** (450 700).

Single Step Paint Correction with No Fillers

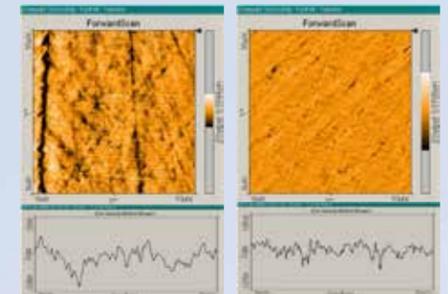

Removes marks of up to P2000

Art.No. 224 141 250 ml/8.45 OZ

Art.No. 224 300 1 L/33.8 FL OZ

What is ProfiLine Perfect Finish for?

SONAX ProfiLine was especially developed for single-level polishing of sanded paint defects such as dust inclusions or paint runs. It removes marks of a P2000 grit or finer. Special nano-sized abrasives allow good removal of scratches and produce perfect gloss without holograms. To check the surface quality after polishing, we meter the micro structure by means of an AFM (atomic force microscope).

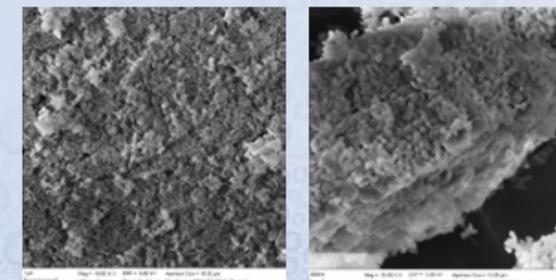

Competitor: Roughness values high. Surface shows holograms.

Perfect Finish: Roughness values low. Surface without any holograms.

What makes SONAX ProfiLine Perfect Finish so special?

It took us many years to find out a perfect blend of coarse and fine crystals. Although the cutting power is high, the particle size is surprisingly low. The bonding of the agglomerates is weak and together with the small starting size they break down very fast to an extremely fine primary particle sized about 100 nm.

SEM (Scanning electron microscope) pictures of an abrasive grain help to understand.

NEW

SONAX SX MultiStar Universal Cleaner

Powerful universal cleaner for all interior and exterior vehicle surfaces. Maximum cleaning power featuring the best material compatibility.

EXTERIOR: Pre-cleaner for the intensive cleaning of heavily soiled surfaces before car wash. Removes insect residue, grease, oil, gasoline, and diesel grime quickly and effortlessly from glass, paintwork, and plastics.

INTERIOR: Removes even the most stubborn stains from roof linings, interior trims, cloth seats, textiles, carpets, and plastic surfaces.

Art.No. 627 600 10 L/338.14 FL OZ

SONAX Glass Cleaner

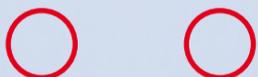

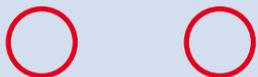

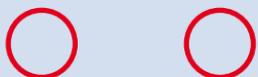

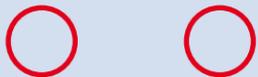

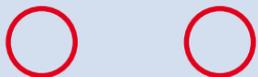

Easily removes bugs, dirt, and smoke residue. For inside and outside use.

For effective, streak-free cleaning of windshields, glass, headlights & mirrors. Easily removes outside dirt & grime and is equally powerful on film build-up on the inside of the vehicle. Also suitable for home use.

NEW

SONAX AutoShampoo Concentrate

Brilliant, surfactant-rich formula. Thick lathering action and pleasant scent.

SONAX Car Wash Shampoo Concentrate is a highly effective, phosphatefree and pH-neutral formula that penetrates and loosens tough dirt without damaging or stripping the protective layer. The special anionic surfactants within, simultaneously adhere and distribute dirt particles and act as emulsifiers absorbing and dissolving oil droplets. SONAX Car Wash Shampoo Concentrate is safe for all finishes and leaves a brilliant, clean shine to your paint, rubber, plastic, vinyl and glass surfaces every time!

Art.No. 314 500 5 L/169.1 FL OZ

SONAX Wheel Cleaner full effect acid-free, pH neutral

Special cleaner to remove stubborn dirt, e.g. baked on brake dust and other road grime from painted steel and light-alloy wheel rims. Neutral pH value ensures gentle cleaning. Effortlessly removes the most stubborn dirt such as baked-on brake dust, oil and rubber residues from all types of steel and alloy wheels (including chromed and polished wheels). Acid-free so it will not attack wheel coatings, lug nuts or brake systems. With lemon fragrance.

Just spray on and let sit 3-5 minutes.

The innovative working indicator shows brake dust and other grime being dissolved.

The result: clean as new.
