

# NGS1000 Sealant & LUBRICANT

NGS1000 valve sealant & Lubricant is a synthetic lubricating composition consisting of selected liquid polyesters appropriately thickened with non-soap thickeners. The stick grade of this sealant contains both soap and non-soap thickeners. NGS1000 sealant has excellent dual resistance to petroleum hydrocarbons and water. It is particularly recommended for regular, premium, and high octane gasoline, kerosene, aviation, and jet fuels.

### Product Specification

Base Oil	Synthetic
Colour	Light Yellow
Texture	Tacky
ASTM Penetration	min 170 in Bulk form min 80 in Stick form
Drop Point	None
Compatibility	Excellent
Solvent Resistance	Excellent
Special Additives	Lubricity Agent
Composition	Semi liquid to Stick Grade
Temperature Range	-24 °C to +180°C
