

8/03 and 8/05 RM Motors

Key Features

- Quiet and reliable 1-1/2" tubular motors
- Torque ratings of 3 and 5 Nm
- Fully encapsulated shock resistant motor coil, moisture proof and fire proof
- Fully compatible with Elero-Matic low voltage communication and control system
- Lift force of 26 or 43 inch-pounds
- Easy limit setting

The Elero 1-1/2" tubular motors, the 8/03 and the 8/05, are the motors of choice for applications in which limited space is a factor. The 8/03 has a torque rating of 3 Nm (26 inch-pounds) and 27 rpm, making it ideal for interior applications of up to 25 lbs. The 8-series motors minimize tube size by utilizing a smaller 1-1/2" tube for fabrication of roller lift systems. These will fit into smaller window pockets or end caps. A varied selection of compatible mounting brackets and adaptors, including the quick release extended L-brackets, are available to complete the installation. Elero control capabilities include automated controls, low voltage controls and wall switches.

Technical Features

- 34 or 55 lb. lift from barrel
- 21" nominal length
- 29-turn limit range
- 3 and 5 Newton meters
- 15 and 27 rpm
- 120 watts
- 1.1 amps

Model and Item Numbers

8/03 Motor	31.771.0001
8/05 Motor	31.761.0001
