# Your Partner for Perfection

## The Utmost in Polishing Expertise

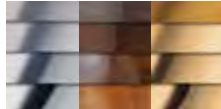

For perfect polishing, we always go the extra mile. With our innovative mixtures and polishing processes, we ensure that you achieve premium results economically and safely. Above-average investment in research and development makes us the technology leader in the polish industry – and an ideal partner for industry and trade.

**Research and Development**  
We develop high-performance formulations in our laboratory.

**Large-Scale Production**  
Complex batch production of the highest quality and adherence to deadlines.

**Automotive Expertise**  
Unbeatable expertise for automotive manufacturers, suppliers, and detailing professionals.

## Focused on Your Success

The best polish for nearly every surface – this is the result of our consistent focus on polishing technology. We are familiar with the characteristics and peculiarities of various applications and materials down to the finest detail. Customers can rely on us to meet their requirements thanks to close collaboration with leading customers from the paint and automotive industries as well as a comprehensive distribution network.

**Process Development**  
Systematic optimization of your polishing processes.

**Industry Expertise**  
Consistently high surface quality with economical consumption.

**Automotive Expertise**  
Unbeatable expertise for automotive manufacturers, suppliers, and detailing professionals.

**Specialist**

## Our Expertise – Your Added Value

### Perfection in Polishing

#### High Performance for the Automotive Industry and Aftermarket Professionals

For polishes that inspire and impress, we develop and produce the most innovative polishing technology.

Menzerna polishing compounds meet the highest industrial standards in automotive plants all over the world. Professionals benefit from this whenever they use our products to shine, polish, maintain, repair, and protect cars. The complete and sophisticated range of polishing products is precisely tailored to the needs and challenges of the automotive industry. Polishing compounds and accessories from Menzerna make long-lasting, brilliant polishes possible, even when working quickly with low material consumption.

- Process orientation according to industry standards
- One-step products for efficient work
- Guidance for the user throughout the polishing process
- Maintains the value of the car's paint
- True polishing results without the use of silicones and fillers
- Range of water-based polishes

# Greater Polishing Performance for Cars

- Removal of scratches, varnish runs, spray, smears, shading, and holograms
- Adjustment of paint finishes
- Creation of various degrees of gloss up to show-car finish
- Refurbishing of surfaces

## Industry Expertise

### Greater Polishing Performance

Always the best solution – for every user, every step of the way. That is what our full range of polishing technology offers the automotive industry. From highly abrasive grind polishes to long-lasting sealants, our products are designed systematically as a coordinated range. Our powerful products and structured processes help you save time and money, which helps you achieve efficient and brilliant polishes.

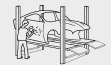

### The first choice for:

- Automobile manufacturers
- Automotive suppliers

- Detailers
- Car lovers

- Body/paint shops

# Heavy Cut Compound 300

## High Performance Compound

### For maximum abrasion.

This high-performance compound leads the field in the removal of sanding marks by lengths. Ideal for professional vehicle detailing and coating. Removes 1500 grit sanding marks and signs of use in the shortest time without damaging the surface or getting adjacent areas dirty. High performance finish thanks to the latest polishing technologies with diminishing abrasives.

Cut/Gloss: 10 / 6

- Advantages:**
- Extremely high abrasion
  - Extremely fast removal of sanding marks
  - High yield
  - Premium polishing compounds
  - No dust formation
  - Easy to handle
  - Silicone free

**Polishing tool:** **HEAVY CUT FOAM PAD**, Lambs wool

**Processing:** rotary, orbital

**Volumes:**

250 ml	22746.281.001
1 l	22746.261.001
1 kg	22746.260.001

Process Example:

**SUPER HEAVY CUT COMPOUND 300** >> **SUPER FINISH 3500** >> **POWER LOCK ULTIMATE PROTECTION**

# Heavy Cut Compound 400

## Performance Compound

### Polishes to gloss in just one process step.

The innovative cut compound for automotive clear coats leaves a dazzling impression everywhere. Gets sanding marks out of the way in record time. Works into the finish range thanks to the latest polishing technology with diminishing abrasives.

Cut/Gloss: 8 / 8

- Advantages:**
- Polishes and produces gloss in one step
  - Saves time thanks to one-step polishing process
  - High efficiency
  - High gloss level
  - Silicone free

**Polishing tool:** **HEAVY CUT FOAM PAD**, Lambs wool

**Processing:** rotary, orbital

**Volumes:**

250 ml	22759.281.001
1 l	22759.261.001
1 kg	22759.260.001

Process Example:

**HEAVY CUT COMPOUND 400** >> **SUPER FINISH 3 500** >> **POWER LOCK ULTIMATE PROTECTION**

## 3 in 1

# One-step Polish: Cut, Gloss & Wax

### Medium cut polish, high-gloss finish and sealant in one.

The all-rounder in top form. Reliably removes streaks, swirls and clouding, and provides lasting protection for the high-gloss surface. Shines with ease and speed, making it ideal for the polishing beginner and for the detailing of employee cars and used vehicles.

Cut/Gloss: 5 / 9

- Advantages:**
- One-step polishing process: Polish, finish, sealant
  - Fast deep gloss finish
  - Silicone free
  - Overpaintable

**Polishing tool:** Medium Cut Foam Pad, Soft Cut Foam Pad, Wax Foam Pad, Microfiber cloth

**Processing:**

Step 1: rotary  
Step 2: rotary/orbital  
Step 3: orbital

**Volumes:**

250 ml	22748.281.001
1 l	22748.261.001

Process Example:

SUPER COMPOUND 300 >> ONE-STEP POLISH 3 IN 1 >> ENDLESS SHINE

# Power Protect Ultra 2 in 1

## High-Gloss Finish & Wax

### 2 in 1: Silicone-free coating sealant and a high-gloss finish

Ultimate performance that goes the distance: Removes fine streaks and holograms in addition to forming a protective film that counteracts the adhesion of dirt.

Cut/Gloss: 2 / 10

- Advantages:**
- 100 % silicone free, overpaintable
  - 2 in 1: High-gloss polish and sealant in one product
  - Tangibly smoother surface
  - Perfect water-beading

**Polishing tool:** **SOFT CUT FOAM PAD, WAX FOAM PAD,**  
Microfiber cloth

**Processing:** Step 1: orbital  
Step 2: orbital

**Volumes:** 250 ml 22753.281.001  
1 l 22753.261.001

Process Example:

HEAVY DUTY COMPOUND 400 >> POWER PROTECT ULTRA 2 in 1

# Heavy Cut Compound 1000

## Pad polish for the fast removal of sanding marks.

This powerhouse eliminates scratches, overspray and pronounced signs of use quickly and thoroughly. Best price-performance ratio.

**Category:** Standard

**Cut/Gloss:** 9 / 3

# Medium Cut Polish 2500

# « Medium Cut Standard Polish

**The classic for the fast removal of sanding marks.**

A solid basis for a fast victory. Offers an optimum combination with the removal of sanding marks and gloss production on automotive clear coats.

**Category:** Standard

**Cut/Gloss:** 5 / 7

- Advantages:**
- Even polishing pattern
  - Extraordinary gloss
  - Silicone free

**Polishing tool:** MEDIUM CUT FOAM PAD

**Processing:** rotary, orbital

**Volumes:**

250 ml	22828.281.001
1 l	22828.261.001

For more cut

For improved agility

**Process Example:**

HEAVY CUT COMPOUND 1000 >> MEDIUM CUT POLISH 2500 >> FINAL FINISH 3000 >> POWER LOCK ULTIMATE PROTECTION

## Medium Cut Polish 2200

### The dazzling alternative with more cutting.

A bit more power in the medium polishing process with an even better cut than the standard polish.

**Category:** Alternative

**Cut/Gloss:** 6 / 7 

- Advantages:**
- Works faster in the medium polish segment thanks to higher abrasiveness
  - Silicone free

**Polishing tool:** MEDIUM CUT FOAM PAD 

**Processing:** rotary, orbital

**Volumes:**  
250 ml 22771.281.001  
1 l 22771.261.001

Process Example:

HEAVY CUT COMPOUND **1**100 >> MEDIUM CUT POLISH **2**200 >> FINAL FINISH **3**000 >> POWER LOCK ULTIMATE PROTECTION

## Medium Cut Polish 2400

### The liquid alternative for easy handling.

The best solution for liquid application to older and dry coating systems. Improved agility ensures easy handling and brilliant results.

**Category:** Alternative

**Cut/Gloss:** 5 / 8 

- Advantages:**
- Liquid formulation is ideal for working on older and dry surfaces
  - Silicone free

**Polishing tool:** MEDIUM CUT FOAM PAD 

**Processing:** rotary, orbital

**Volumes:**  
250 ml 22923.281.001  
1 l 22923.261.001

Process Example:

HEAVY CUT COMPOUND **1**100 >> MEDIUM CUT POLISH **2**400 >> FINAL FINISH **3**000 >> POWER LOCK ULTIMATE PROTECTION

# Final Finish 3000

# « Standard Finish

## Classic swirl remover for a perfect gloss.

The standard high-gloss polish is absolutely reliable in the removal of polishing marks, clearing the way for a brilliant gloss.

**Category:** Standard

**Cut/Gloss:** 3 / 9

- Advantages:**
- Fine abrasives for removing fogging and holograms
  - Brilliant gloss
  - Silicone free

**Polishing tool:** **SOFT CUT FOAM PAD,**  
Microfiber cloth

**Processing:** rotary, orbital

**Volumes:**

250 ml      22029.281.001  
1 l          22029.261.001

For a perfect mirror finish

For an ultimate high definition gloss

## Process Example:

MEDIUM CUT POLISH **2500** >> FINAL FINISH **3000** >> POWER LOCK ULTIMATE PROTECTION

## Super Finish 3500

### Swirl remover for a perfect mirror finish.

The master of all classes removes polishing marks, micro-scratches and holograms, guaranteeing a brilliant deep gloss.

**Category:** Alternative

**Cut/Gloss:** 2 / 10 

- Advantages:**
- Finest abrasives for removing fogging and holograms
  - Brilliant deep gloss
  - Silicone free

**Polishing tool:** **SOFT CUT FOAM PAD,**  
Microfiber cloth 

**Processing:** rotary, orbital

**Volumes:**  
250 ml 22911.281.001  
1 l 22911.261.001

## Super Finish Plus 3800

### Show car finish for the ultimate deep gloss.

Removes polishing marks, micro-scratches and holograms in a brilliant performance with genuine star qualities.

**Category:** Alternative

**Cut/Gloss:** 1 / 10 

- Advantages:**
- Finest abrasives for removing fogging on holograms
  - Show car finish
  - Silicone free

**Polishing tool:** **SOFT CUT FOAM PAD,**  
Microfiber cloth 

**Processing:** rotary, orbital

**Volumes:**  
250 ml 22992.281.001  
1 l 22992.261.001

Process Example:

**HEAVY DUTY COMPOUND 300** >> **SUPER FINISH 3500** >> **POWER LOCK ULTIMATE PROTECTION**

Process Example:

**SUPER FINISH PLUS 3800** >> **POWER LOCK ULTIMATE PROTECTION** >> **ENDLESS SHINE**

# Power Lock Ultimate Protection

# « Sealing Recommendation

## Polymer coating sealant for all automotive clear coats.

The long-haul specialist acts as a lasting sealant, reliably protecting against environmental influences with an unrivalled beading effect and ultimate deep gloss.

**Category:** Standard

- Advantages:**
- Sealing technology of the latest generation
  - Extremely long service life
  - Maximum protection against environmental influences
  - Premium beading behaviour
  - Protects the vehicle's value

**Polishing tool:** **WAX FOAM PAD,**  
Microfiber cloth

**Processing:** orbital, by hand

**Volumes:**

250 ml      22070.281.001  
1 l          22070.261.001

For tangible  
smooth surfaces

Standard  
Protection

**Process Example:**

**HEAVY DUTY COMPOUND 400** >> **SUPER FINISH 3500** >> **POWER LOCK ULTIMATE PROTECTION**

# Liquid Carnauba Protection

## Natural sealing blend for surface enthusiasts

Long-lasting, functional protection combined with a soft, natural feel and brilliant deep gloss. Developed for perceptibly smoother surfaces.

**Category:** Alternative

- Advantages:**
- High-quality carnauba wax
  - Very high wax content
  - Hydrophobic surface
  - Very good drop formation
  - Soft surface feel
  - Ultimate deep gloss
  - For machine and manual processing

**Polishing tool:** **WAX FOAM PAD,**  
Microfiber cloth

**Processing:** orbital, by hand

**Volumes:**

250 ml	22068.281.001
1 l	22068.261.001

# Sealing Wax Protection

## Standard coating sealant

Produces a deep gloss and brilliance on the coating surface. Builds up a protective film that counteracts the adhesion of dirt.

**Category:** Alternative

- Advantages:**
- Reliable basic protection
  - Straightforward processing
  - Silicone free

**Polishing tool:** **WAX FOAM PAD,**  
Microfiber cloth

**Processing:** orbital, by hand

**Volumes:**

250 ml	22870.281.001
1 l	22870.261.001

**Process Example:**

**HEAVY CUT COMPOUND 400** >> **SUPER FINISH 3500** >> **LIQUID CARNAUBA PROTECTION**

**Process Example:**

**HEAVY CUT COMPOUND 1000** >> **MEDIUM CUT POLISH 2500** >> **FINAL FINISH 3000** >> **SEALING WAX PROTECTION**

## Metal Polish

Metal Polish cleans and polishes stainless steel, aluminium, chrome, brass, copper, silver and plastics. Perfect gloss for exhaust, radiator grille, decorative strips, rims etc. Also perfect on domestic and leisure parts like cutlery, sanitary fittings, metal instruments etc.

**Polishing tool:** Microfiber cloth

**Processing:**

1. Apply by hand with microfiber
2. Polish with circular movements
3. Remove residue with a clean, soft cloth

**Volumes:**

125 g	23003.391.001
1 kg	23003.420.001

## Control Cleaner

### Cleaning spray for especially thorough polishing

The ultimate pre-cleaner to support the visual inspection of the coating surface being worked on. Removes polish residues, grease and contaminants prior to sealing.

**Advantages:**

- Remove all traces of polishing residues and grease
- Straightforward application thanks to the high-quality spray head
- No discolouration

**Polishing tool:** Microfiber cloth

**Processing:** by hand

**Volumes:**

500 ml	22932.271.001
--------	---------------

Process Example:

**CONTROL CLEANER** >> POLISHING >> **CONTROL CLEANER** >> SEALING

## Endless Shine

### Detailing spray to refresh the gloss

Wellness program for all smooth surfaces like clear coat, glass, plastic or metal. Applies a protective film to the coating with a beautiful, deep gloss – including premium beading effect.

**Category:** Accessory

**Advantages:**

- Protection and gloss refreshment
- Extended durability of the sealant
- Perfect water beading
- Leaves no traces on plastic
- Versatile in application:  
After washing, after polishing
- Antistatic effect
- Without the addition of waxes and fillers

**Polishing tool:** Microfiber cloth

**Processing:** by hand

**Volumes:**

500 ml	22747.271.001
--------	---------------

Process Example:

POLISHING/  
SEALING >> **ENDLESS SHINE** // CAR WASH >> **ENDLESS SHINE**

## Liquid Matt

### Matting paste for surface preparation

Establishes the conditions required for reliable results in repainting or refinishing. Works on a water basis – for mechanical or manual application.

- Advantages:**
- Uniform surface
  - Establishes the optimum basis for coating application
  - Straightforward application, even on rounded surfaces

**Polishing tool:** Non-woven abrasive, Lambs wool, **HEAVY CUT FOAM PAD**

**Processing:** rotary, by hand

**Volumes:**  
1l 20144.261.001

## Solid Grit

### Sanding block for sanding clear coat surfaces

Solid Grit reliably and easily removes scratches, runs, dust inclusions, etching and orange peel, and is perfect for use on repairs. The two P2000 and P3000 sanding blocks are supplied in a handy plexiglass case. Both blocks are very low-wearing and ensure the best manual sanding quality.

**Processing:** by hand

**Volumes:**  
2 pieces per set 26902.100.000

## Premium Pad Program

Original Menzerna polishing tools get the maximum out of your surface. The pads in different degrees of hardness are optimised for use with the Menzerna automotive polishing products. A safety edge protects against damage by the backing plate on curvatures. The washable foam perfectly adapts to the surface.

- Advantages:**
- Washable
  - Safety edge
  - High-quality Velcro
  - Convenient to use
  - Consistent, long-lasting foam

**Application:** rotary, orbital

**Diameter:** 150 mm / 6"

**At a glance:**  
The Menzerna Polishing Program

**Menzerna:**  
Economical, reliable and flexible  
in application. Brilliant.

The Menzerna polishing programme is designed as a flexible 4-step  
polishing system.

**Confidence in success**

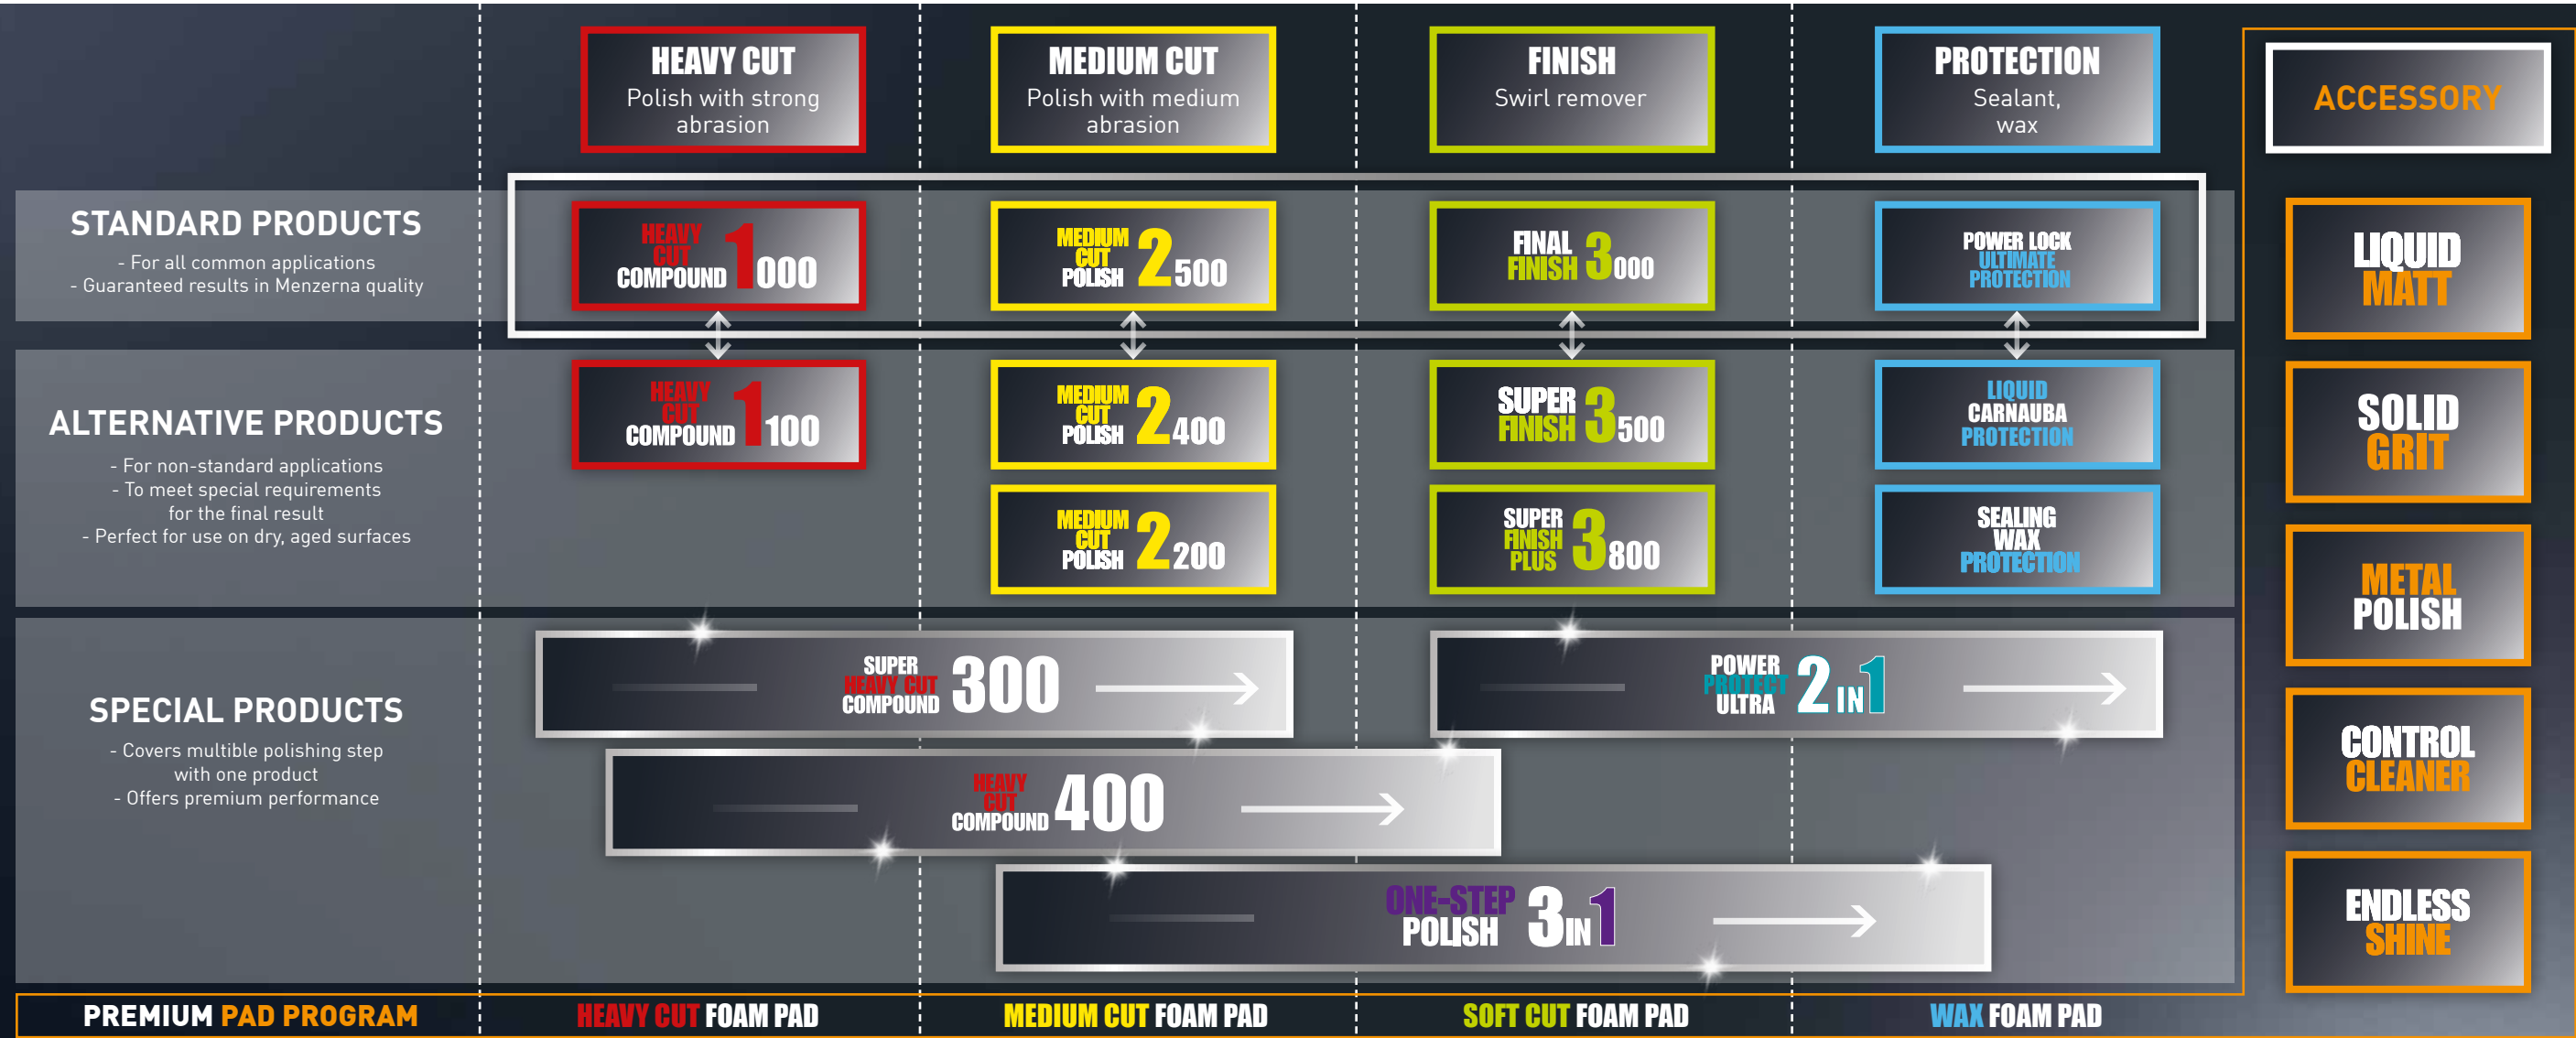

A standard product is assigned to each of the four polishing  
levels – Heavy Cut, Medium Cut, Finish and Protection.  
Together these products form the Menzerna standard process,  
which is considered as recommendation. Numerous application  
cases are securely covered in practice with this process.

**Quality through flexibility**

Alternative and special products are available for each polishing  
level – to meet the needs of special application cases, or for even  
greater performance. All Menzerna products are matched to each  
other so that the interplay works 100 % at all times even when stan-  
dard products are exchanged.

**The latest polishing technologies for working efficiently**

Many years of experience and close cooperation with the automo-  
bile industry and leading coating manufacturers ensure economic  
efficiency and fast processes. This is where the specialty products,  
identified by the silver label, truly come into their own. Multiple  
polishing steps are covered by the latest polishing technologies.

**Note:**  
In the Menzerna process flyers, users will find system recommendations  
for the fields of vehicle detailing, vehicle coating, finishing and care. [www.menzerna.com](http://www.menzerna.com)

**Polished surfaces** that make an impression.
