

NGS SLV 515 Semi-Synthetic Wellhead Valve Lube & Sealant

- NGS SLV 515 Semi-Synthetic is a high temperature Well Head valve lubricant & Sealant. It is formulated as a heavy-duty industrial lubricant with rust, corrosion and extreme pressure additives.
- NGS SLV 515 *Semi-Synthetic Well Head Lube* graphite lubricant which provides a residual film of low co-efficient of friction which enhances its recommendation for industrial application. This graphite-based grease forms a lubricating and sealing film that prevents metal-to-metal contact by separating frictional surfaces.

TYPICAL SPECIFICATIONS

Type	Semi-Synthetic
Base	Complex Mixture
Active Component	Graphite
Color	Black
Dropping Point	None
Penetration Worked @ 77° F	220 - 250
NLGI Grade	No. 3
Separation	Nil
Timken Load ASTM D2509	50 Lbs. +
Additional Properties	High Temperature Washout Resistant EP. Lubricant Film Forming Corrosion and Rust Inhibitors Oxidation Inhibited
