

MVS-505 Smartphone Endoscope

Overview:

MVS-505 is a pioneer model in the video scopes that can perform as a handy tool with the features of more complex and more expensive video borescopes.

The user can easily download the app of the MVS-505 and connect to the smartphone in a short time and start exploring.

The device is widely used in mechanics, construction, excavation, machinery, etc.

Features:

- Small size and innovative design
- High resolution imaging
- Easy to operate
- WIFI, Charging and battery status indicators
- Suitable for Android & iOS Operating devices
- Video & Image

Parameter	Values
Image sensor	CMOS sensor
Technology	Pan / Tilt / Zoom
Effective resolution	300.000 pixels
Focus distance	30mm-80mm
Angle of view	60 Degree FOV (D)
Camera diameter	5.5 mm
Probe length	2 meters
LED illumination	6 LEDs (adjustable brightness)
Handle working time	Appr. 6 hours
Working voltage & current	5VDC & 600mA
Memory	Capacity up to 32GB SD card
Operating temperature	-10°C to 50°C
IP	67
Power supply	Rechargeable Battery (USB)
Weight	Appr. 200g
