

BPP - BATTERY POWERED HYDRAULIC PUMP

Working pressure 700 Bar

Lightweight design

14.4V long life battery

C

The Hi-Force BPP107 battery powered hydraulic pump is designed for operator convenience in terms of handling and power supply. Driven by a powerful 14.4V long life battery the unit takes away the physical effort required by a manually operated hand or foot pump, whilst at the same time eliminating the need for an external power source. The pump is supplied with a shoulder strap and its ergonomic lightweight design (8.0 kg) makes the unit very portable and user friendly. The pump incorporates an automatic pressure relief and release valve meaning that the pressure automatically relieves once the pump reaches its maximum pressure of 700 Bar, making the pump ideal for use with Hi-Force CH series crimping tools, NS series nut splitters, HCH cutters and HKP series knockout punches.

Model number	Max working pressure	Oil Cap litres	Oil Flow litres/min		Weight kg	Dimensions in mm		
			1st stage	2nd stage		Length	Width	Height
